 *
 * IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION *
 *
 * Foreign Agricultural Trade of the United States is published six times a
 * year with two supplements. Subscription prices are \$21 a year domestic
 * and \$26.25 foreign (prices subject to change). Send check or money order
 * payable to "Superintendent of Documents" to Superintendent of Documents,
 * U.S. Government Printing Office, Washington, D.C. 20402. For faster
 * service, call (202) 783-3238 and charge your subscription to your VISA,
 * MasterCard, or GPO Deposit Account.
 *
 *
 *
 * IS IT TIME TO RENEW? *
 *
 * Your subscription to this publication may be due to expire soon. If so,
 * you will get a renewal notice in the mail from GPO about 90 days ahead of
 * time. Only one notice is sent. You must return it promptly to ensure
 * uninterrupted service. If you have misplaced your renewal notice, use the
 * form on the back of this report. Be sure to attach mailing label.

Prepared by the World Analysis Branch, International Economics Division,
 Economic Research Service, U.S. Department of Agriculture. Principal
 coordinators were Edward C. Overton, Thomas A. Warden, and Thomasine B.
 McCall. Mary L. Fant provided statistical support. Sue Daigrepoint provided
 word processing and table formatting support. Editorial support was provided
 by Linda L. Hatcher, Research Information Branch, Economics Management Staff.
 Data processing support was provided by Sharlan Lindow and William Meiller,
 International Economic System Branch, Data Services Center, and Penni Korb,
 World Analysis Branch.

Digest

First Gain in Agricultural Exports in 3 Years (see p. 2). U.S. agricultural export values rose 5 percent in calendar year 1984 to \$37.8 billion, the first increase since 1981. Higher prices for corn, cotton, vegetable oil, and cattle hides teamed with increased wheat, sorghum, and cotton shipments, and offset volume declines for soybeans, soybean meal, and feeds and fodders.

1984 Imports Reach New High (see p. 64). U.S. agricultural imports in 1984 jumped to a record \$19.3 billion, up \$2.8 billion from 1983. During December 1984, they reached \$1.4 billion, compared with \$1.3 billion in December 1983. An expanding U.S. economy, a strong dollar on international markets, winter freezes in Florida and Texas, and rapid price increases for coffee, rubber, fruit juices, vegetable oils, and cocoa products spurred the advance.

U.S. Dollar Strong in 1984 (see p. 105). High U.S. interest rates and rapid economic growth helped strengthen the dollar in 1984. The dollar fell slightly during the first 3 months of the year, then advanced steadily into late September, and consolidated its position during the last 3 months. By yearend, the U.S. dollar value approached 1 British pound and 10 French francs, and became solidly entrenched above 3 German marks.

Less U.S. Agricultural Aid Abroad (see p. 110). Agricultural exports under U.S. Government-financed programs totaled \$1.26 billion in fiscal year (FY) 1984 (October 1983–September 1984), 4 percent below 1983's record and 3 percent of all U.S. agricultural exports in FY 1984. The United States shipped over 6.2 million metric tons of food aid during 1984. Egypt took 28 percent of total U.S. concessional agricultural exports and remained the major recipient out of 72 countries.

Exports to Sub-Saharan Africa To Dip Slightly (see p. 118). U.S. agricultural exports to Sub-Saharan Africa are forecast to dip to \$1.24 billion during FY 1985, about 6 percent below FY 1984's record \$1.33 billion. Exports to South Africa are expected to drop, but those to several other countries, including Sudan, Ethiopia, Kenya, Mozambique, Niger, Chad, and Mali, will climb, due primarily to larger food aid shipments.

CCC Credit To Boost Exports to Middle East and North Africa (see p. 122). Commodity Credit Corporation guarantees will boost U.S. agricultural exports to the Middle East and North Africa in FY 1985. Exports to the Mideast will climb 15 percent over those of FY 1984 to more than \$2.1 billion, and exports to North Africa will reach \$1.7 billion, a 9-percent increase.

First Gain in Agricultural Exports in 3 Years

U.S. agricultural export values rose 5 percent to \$37.8 billion in calendar year 1984, the first increase since 1981. Higher prices for corn, cotton, vegetable oil, and cattle hides teamed with increased wheat, sorghum, and cotton shipments, and offset volume declines for soybeans, soybean meal, and feeds and fodders.

Export gains were strongest to the Soviet Union, Japan, South Africa, and Turkey. Agricultural export value to the Soviet Union nearly doubled while that to Turkey rose sevenfold. Shipments especially declined to the Netherlands, West Germany, and India.

Corn, Cotton, Hides, and Wheat Gain

Corn export values rose over \$600 million to \$7 billion, as lower supplies boosted prices close to 1981 levels. Export volume rose slightly to 49 million tons. Corn was the largest single factor behind increased exports to the Soviet Union. Corn exports also increased dramatically to South Africa, where 3 years of drought changed the status of a traditional exporter. Shipments to Japan, the United States' largest customer, continued to rise, but shipments to Mexico fell over 40 percent and those to Peru fell over 75 percent. The largest decrease, however, stemmed from China's failure to import any U.S. corn in 1984, a 1.36-million-ton drop.

Cotton export value rose 34 percent to \$2.4 billion, producing the largest export increase in 1984. Rebounding textile production and lower foreign supplies combined to raise prices and U.S. export volume. Volume increased 25 percent to nearly 1.5 million tons. As with corn, the largest increase was in shipments to the Soviet Union, following a short crop there. Similarly, a poor South Asian crop nearly tripled exports to Bangladesh and even led to significant exports to Pakistan. Hong Kong's imports of U.S. cotton rebounded strongly in 1984, as did Taiwan's, and shipments to Western Europe rose nearly 60 percent.

Cattle hide exports rose close to 50 percent to \$1.1 billion; exports to South Korea and Japan accounted for much of the increase. Cattle hides also accounted for a significant rise in otherwise declining U.S. exports to Eastern Europe.

Wheat exports rose 4 percent to \$6.5 billion in 1984. Dramatically increased volume to China and the Soviet Union more than offset falling prices. September's U.S. wheat shipments reached a record-high 6.6 million tons largely because of heavy Soviet imports. The year's total shipments reached 42.2 million tons, the highest since 1981. However, China's notable increase in imports of U.S. wheat in 1984 was not sufficient to meet its obligations under the now-expired long-term agreement with the United States. Morocco, Turkey, and Bangladesh increased their U.S. wheat imports, while shipments to Yugoslavia, Egypt, Peru, and the Philippines declined. Record Indian wheat supplies led that country to halt its substantial imports of U.S. wheat.

Rice, Soybeans, and Soybean Meal Lead Declines

U.S. rice exports continued to drop, reaching 2.19 million tons and \$845 million in 1984. Italy and Belgium, however, led the European Community (EC) in increased imports of U.S. rice. Portugal had an even larger increase, as did Iraq, which

increased its imports for the third year in a row. U.S. rice shipments to South Korea dropped the most because of a good crop there. A good crop and large stocks led Indonesian imports of U.S. rice to fall off, and competition combined with foreign exchange constraints caused the rice import decline in Nigeria.

Reduced U.S. supplies, a strong U.S. dollar, and reduced EC feeding rates pushed U.S. soybean meal exports down nearly a third to \$1 billion and 4.5 million tons, the largest export value decline of any U.S. agricultural commodity in 1984 and the smallest meal volume exported since 1977. The EC reduced its imports nearly 60 percent, with the Netherlands registering an enormous decline. Italy and West Germany also imported substantially less. U.S. exports to the Philippines increased sharply as its non-U.S. credit options temporarily disappeared. Credit availability also led to increased Iraqi imports. Shipments gained to Poland, Canada, and Venezuela, while shipments fell to Hungary, South Korea, and Mexico.

Soybean exports dropped \$494 million, or 8 percent, to \$5.4 billion, the second largest decline in U.S. export value in 1984. Volume fell 14 percent to 19.5 million tons due to a dramatic decline in U.S. production and a subsequent increase in prices. More than half the decline is attributed to the EC, mostly to the Netherlands and West Germany. Japan's imports also slipped, but the value remained virtually the same as 1983's level. Spain, the Soviet Union, Taiwan, and Indonesia imported a significantly smaller volume of U.S. soybeans in 1984, but Mexico, Romania, and Venezuela increased their imports. Mexico also significantly increased its imports of sunflower seeds and other oilseeds, nearly offsetting the lower value of its substantially reduced feed grain imports.

The dramatic decline in U.S. soybean production in 1983 coincided with a decline in palm oil supplies; as a result, soybean oil prices skyrocketed to their highest level in 10 years. U.S. vegetable oil exports rose 43 percent in value with only a 10-percent increase in volume. Vegetable oil exports reached 1.6 million tons and \$1.27 billion, a \$381-million increase from 1983. The decline in palm oil supplies particularly affected South Asia which increased the volume of its U.S. vegetable oil imports over 80 percent. India increased its vegetable oil imports even more. Mexico, Central America, and the Caribbean were responsible for much of the remaining volume increase. Foreign exchange concerns led to dramatic declines in shipments to Peru and Colombia. Similar concerns led to an even larger decline as Yugoslavia virtually halted its U.S. vegetable oil imports, despite available guarantees under the Export Credit Guarantee Program.

Higher prices pushed U.S. exports of animal fats and oils up 16 percent in value, despite an 8-percent drop in volume. The volume of animal fats and oils increased substantially to Pakistan, Mexico, Egypt, and Brazil. Shipments decreased to the EC, Japan, Taiwan, and Nicaragua.

Feed and fodder exports declined 4 percent to \$1.2 billion and 7 million tons. Declines centered in the EC but, unlike meal, largely stemmed from shipments to West Germany. The Netherlands, by far the largest U.S. customer for both categories, increased its feed and fodder imports, in marked contrast to meal. Feed and fodder shipments to Canada and Latin America dropped, but rose significantly to Japan, Taiwan, and Iraq. Iraq imported no U.S. feeds and fodders in 1983 but did in 1984 as part of an across-the-board increase in imports of U.S. farm products that made it one of the fastest growing markets of 1984.

Tobacco exports rose slightly to \$1.5 billion as greater volume offset slightly lower prices. (Stephen MacDonald, World Analysis Branch)

(1) Unit value cannot be computed.

1984 Imports Reach New High

U.S. agricultural imports in calendar year (CY) 1984 jumped to a record \$19.3 billion, up \$2.8 billion from 1983 levels. During December 1984, they reached \$1.4 billion, compared with \$1.3 billion in December 1983. An expanding U.S. economy, a strong dollar on international markets, winter freezes in Florida and Texas, and rapid price increases for coffee, rubber, fruit juices, vegetable oils, and cocoa products spurred the advance.

Developing nations shipped agricultural products worth \$11.3 billion to the United States in 1984, accounting for 58.5 percent of U.S. agricultural imports, compared with \$7.6 billion from developed countries. Brazil is the largest source of U.S. agricultural imports, followed by Canada, Mexico, Indonesia, Australia, Colombia, France, the Philippines, and the Netherlands.

Competitive Imports Escalate

Competitive imports escalated to \$12.6 billion in 1984, 14.5 percent above those of 1983. Vegetables, vegetable oils, fruits, fruit juices, live swine, pork, wine, malt beverages, and cut flowers accounted for the bulk of the gain and more than offset declines for beef, tobacco, and live cattle.

Beef import values, accounting for 60 percent of U.S. meat imports, fell 10 percent to \$1.2 billion. Volume declined 7 percent to 595,000 tons. Australia supplied nearly 41 percent of the U.S. beef imports in 1984; New Zealand, the other major supplier, shipped another 24 percent. U.S. red meat and poultry consumption is expected to decline from an estimated 210 pounds per person in FY 1984 to about 208 pounds in FY 1985.

Lower U.S. domestic pork output in CY 1984 pushed imports to a record of \$755 million, up 24 percent from 1983's levels. Fresh and frozen pork tonnage, mainly from Canada, as well as canned pork from Denmark, gained substantially. Live swine entries from Canada more than doubled to 1.3 million. Strikes at Canadian meatpacking plants resulted in record live swine shipments to U.S. processing plants.

Live cattle imports fell in 1984 to 753,000 head at \$286 million from 921,000 head at \$313 million in 1983. About 363,000 head of Canadian feeders and stockers entered U.S. markets in 1984, up from 359,000 head in 1983. Mexico shipped some 390,000 head in 1984, down sharply from 1983's 562,000 head.

A 6-percent drop in average import unit prices kept U.S. cheese import values in 1984 at \$385 million, unchanged from those of 1983. However, volume increased 7 percent to 139,000 tons. Western Europe and New Zealand shipped most of the imported cheese.

A sharp drop in machine-threshed tobacco imports in 1984, mainly from Brazil, South Korea, and other Latin American countries, reduced tobacco imports. Filler leaf imports increased 37 percent to 145,000 tons valued at \$492 million and remained a large proportion of U.S. tobacco imports. Turkey and Brazil were the major suppliers.

U.S. sugar import values in CY 1984 totaled \$1.1 billion, 8 percent higher than 1983 levels because of large quota exemptions, stronger re-exports, and higher prices. Volume totaled nearly 2.7 million tons compared with 2.6 million tons in 1983. U.S. sugar consumption in FY 1985 may decline to 7.5 million tons (raw value), compared with 7.8 million tons in FY 1984. Import unit prices rebounded in CY 1984, averaging \$415 per ton, compared with \$388 in 1983. Wholesale sugar prices in the U.S. market averaged 21 cents per pound in 1984, 1 cent less than in 1983. Import demand and use for HFCS rose sharply in 1984 and are expected to continue upward in 1985. The Dominican Republic supplied most of the raw sugar, shipping 18 percent of U.S. import volume in 1984, followed by the Philippines, Brazil, Australia, and Argentina.

Concentrated orange juice from Brazil, fresh grapes from Chile, and canned pineapple from Asia spurred fruit and preparation imports in 1984 to rise 46 percent over year-earlier values to \$1.5 billion. Fruit juice imports increased 42 percent above 1983 levels to 30.3 million hectoliters, with the value expanding 78 percent to \$808 million. Vegetable and preparation imports rose 24 percent to \$1.3 billion, with advances in canned mushrooms from Taiwan and China and processed tomatoes from Italy and Spain. Fresh vegetable tonnage from Mexico, such as tomatoes, onions, and peppers advanced because of lower import prices.

Oilseed and product imports reached a record-high \$797 million in 1984, 36 percent over 1983's value, mainly because of higher prices. Vegetable oils, principally coconut and palm oils, accounted for most of the imports of oilseeds and products. Prices rose sharply throughout CY 1984 as quantities of major imported vegetable oils dropped considerably. Import unit prices for coconut oil in December 1984 averaged about 82 percent above those of December 1983, while palm oil prices registered gains of approximately 67 percent. However, favorable prices for domestic soybean oil resulted in replacement of some coconut oil imports. The Philippines supplied the bulk of the coconut oil, and Malaysia provided about 87 percent of the palm oil.

Other competitive imports that gained in value included wine, malt beverages, horses, poultry products, hides, wool, tree nuts, cut flowers, nursery stock, grains, and feeds.

Noncompetitive Imports Top 1983 Levels

Noncompetitive imports in 1984, accounting for nearly 35 percent of all agricultural imports, rose 22 percent from 1983's level to \$6.7 billion. Coffee and products, representing 49 percent of all U.S. noncompetitive imports, totaled \$3.3 billion, 18 percent ahead of year-earlier values. Volume rose 8 percent to 1.1 million tons, and unit import prices increased from \$1.23 per pound to \$1.34 during the same period in 1984. Brazil, Colombia, Mexico, Guatemala, El Salvador, the Ivory Coast, Ecuador, and Indonesia were the major suppliers.

Cocoa and products totaled \$1.1 billion in 1984, a 35-percent increase over those of 1983, due to larger imports of chocolate, cocoa butter, and cake and powder. Despite higher prices and lower cocoa bean imports, the volume rose about 6 percent to 476,000 tons, as import unit prices jumped nearly 27 percent to \$2,381 per ton. With U.S. stocks down, world cocoa bean production up, and prices easing, U.S. cocoa bean imports are likely to be heavy in 1985 and could exceed 1984's 194,000 tons. Brazil, the Ivory Coast, Ecuador, the Netherlands, the Dominican Republic, and Canada supplied most of the cocoa and product imports to the United States. The New York cocoa bean futures price, averaging 92 cents per pound from

January-December 1983, increased to \$1.06 per pound in this same period in 1984, mainly due to tighter supplies.

Increased U.S. industrial demand and higher prices boosted crude rubber imports 26 percent in 1984, totaling \$824 million. Volume rose 17 percent to 803,000 tons. Indonesia and Malaysia shipped most of the U.S. rubber imports.

Values for many other major noncompetitive imports also gained, especially bananas. U.S. banana imports increased nearly 8 percent in volume and 11 percent in value in 1984 to \$665 million. Bananas are the fourth largest noncompetitive import and come mostly from Latin America. (Charles E. Goode, World Analysis Branch)

U.S. Dollar Strong in 1984

High U.S. interest rates and rapid economic growth helped strengthen the dollar in calendar year 1984. The dollar fell slightly during the first 3 months of the year, then advanced steadily into late September, and consolidated its position during the last 3 months. By yearend, the U.S. dollar value approached 1 British pound and 10 French francs, and became solidly entrenched above 3 German marks.

U.S. Interest Rates Lure Investors

Rates of return in the United States during 1984 exceeded those anywhere else in the world. Dollar-denominated assets paid between 3 and 7 percent more than similar instruments issued in other major countries. When adjusted for inflation, the dollar advantage became even clearer. Investors and major banks, seeking the highest short- and long-term return for idle funds, rushed to buy dollars during much of the year.

Dollar Drops in Early 1984

The expectation of rising U.S. inflation helped weaken the dollar during the first 3 months of 1984 against the German mark, the Japanese yen, the British pound, the Dutch guilder, and the Canadian dollar, the five currencies most important to U.S. agricultural trade. Faster price increases would erode the real rates of return on dollar assets by reducing the future values of those holdings. The widespread belief that accelerating inflation was imminent led to a sharp decline in the dollar's value from mid-January through early April. The failure of such forecasts to materialize and robust U.S. economic growth during the first quarter fueled a 6-month surge in the international value of U.S. currency.

Dollar Sets Records Against European Currencies

The strength of the U.S. economy during the first two quarters of 1984 swept away any notion that other opportunities could substitute for investment in the United States. High and rising interest rates began to attract more and more capital to the United States. In addition, rapid economic growth put upward pressure on credit costs as inventory demand increased, plant and equipment purchases accelerated, and consumer loans advanced. The Federal budget deficit, hanging over these other factors, reinforced the view that interest rates would continue upward.

The U.S. economic situation contrasted sharply with that of the rest of the developed world, especially Western Europe. Economic growth in Europe was best described as sluggish, with policies that discouraged rising interest rates there. Investment opportunities abroad simply could not match the vast array of financial instruments available in the United States. As a result, the U.S. dollar set systematic record highs against weaker European monies such as the British pound, French franc, and Italian lira. The dollar also reached an 11-year peak against the German mark and a 7-year peak against the Swiss franc.

Dollar Consolidates Gains

Currency traders re-evaluated their positions regarding the portfolios of their holdings as the U.S. economy slowed in the third and fourth quarters. As a result,

the dollar dipped slightly in late October and early November. Some traders also expressed anxiety about the U.S. elections, but this seemed to have little effect on the dollar's value.

Following this brief break in what had been a steady appreciation, U.S. currency continued its upward path through the end of 1984 due to the anticipation of a spurt in economic growth and an accompanying rise in U.S. interest rates in early 1985. The December surge left the dollar solidly above 3 marks, its highest level since 1973. The dollar is also closing in on 1 pound sterling and 10 French francs, neither of which was imaginable at the start of the year. Only the yen, of the world's major currencies, remained within 5 percent of its beginning-year value by the end of 1984. (David Stallings, World Analysis Branch)

Less U.S. Agricultural Aid Abroad

Agricultural exports under U.S. Government-financed programs totaled \$1.26 billion in fiscal year (FY) 1984 (October 1983–September 1984), 4 percent below 1983's record and 3 percent of all U.S. agricultural exports in FY 1984. The United States shipped over 6.2 million metric tons of food aid during 1984, primarily wheat, soybean oil, corn, wheat flour, and rice. Egypt received \$356 million, or 28 percent of total U.S. concessional agricultural exports, and remained the major recipient out of 72 countries.

Long-term credit sales under Public Law (P.L.) 480 Title I for FY 1984, valued at \$763 million, fell 6 percent below those in 1983. Values declined for wheat, rice, and soybean oil. However, volume rose 2 percent to nearly 4.1 million tons. Egypt received 32 percent of Title I sales, followed by Bangladesh, Pakistan, Sudan, and El Salvador. Bangladesh was the only country to purchase U.S. cotton under long-term credit sales, valued at \$112 million.

Title II donations, valued at \$355 million, accounted for 30 percent of Government program exports. Sixty percent of Title II donations were shipped through voluntary relief agencies, 21 percent through the World Food Program, and 19 percent under government-to-government programs. Major commodities were soybean oil, corn-soya milk, bulgur wheat, and wheat flour.

Section 416 of the Agricultural Act of 1949 authorizes the donation of surplus dairy products through the Commodity Credit Corporation price-support operation for food assistance overseas. The United States donated 50,000 metric tons of dairy products valued at \$46 million in 1984. Butter, cheese, nonfat dry milk, and anhydrous milk fat were the surplus stocks shipped. Poland, Mexico, and Mauritania received over half of the donated dairy products, with the remaining surplus distributed among 10 other countries.

Agency for International Development (AID) disbursements totaled \$104 million, 20 percent less than those in 1983. Egypt remained the major AID recipient, with corn as the major commodity. (Fannye Lockley, World Analysis Branch)

Exports to Sub-Saharan Africa To Dip Slightly

U.S. agricultural exports to Sub-Saharan Africa are forecast to dip to \$1.24 billion during fiscal year (FY) 1985 (October 1984–September 1985), about 6 percent below FY 1984's record \$1.33 billion. Exports to South Africa will drop, but those to several other countries, including Sudan, Ethiopia, Kenya, Mozambique, Niger, Chad, and Mali, will climb, due primarily to larger food aid shipments. Public Law (P.L.) 480 Title I sales for FY 1985 are forecast to exceed those of 1984 by over one-third. Emergency food aid approvals under Title II in the first 3 months of FY 1985 have already topped the total for FY 1984. 1/

U.S. wheat and product shipments to the area are expected to exceed those of 1984 by 28 percent to nearly 2.8 million tons, and values should increase 25 percent to a record \$445 million. Sorghum exports will rise about 32 percent to \$38 million. Blended food products, nonfat dry milk, and soybean oil exports are also expected to increase. Exports of most other major items are expected to fall, compared with those of 1984. Corn sales are projected to drop from the record \$451 million of 1984 because South Africa's 1985 corn harvest may be better than its disastrous 1983 and 1984 harvests.

U.S. grain and feed exports should total \$1 billion, down 2 percent from 1984's record. U.S. rice exports will remain relatively weak, estimated at only \$156 million in 1985 in contrast to a record \$356 million in FY 1982.

Exports to East Africa To Jump Sharply

U.S. agricultural exports to East Africa, especially to Ethiopia, Kenya, and Sudan, will jump sharply in FY 1985 because of severe drought during the 1984 growing season. Exports of grains, blended food products, and nonfat dry milk will increase the most.

Exports to Ethiopia will escalate dramatically in response to the famine there. Nearly all of the projected \$96 million will be sent as emergency aid. Most of the exports will consist of grains, with smaller amounts of dairy products, blended food products, and vegetable oils.

Kenya requires unprecedented amounts of corn and wheat imports because of the worst drought in over 50 years. Unlike most African countries, Kenya has substantial foreign exchange reserves. Although Kenya's reserves have been dropping since May 1984, they still totaled \$386 million at the end of November. Kenya has already commercially imported substantial amounts of bagged corn from Thailand which devalued its currency and can offer corn at lower prices than the United States can. Nevertheless, U.S. corn exports, mainly as food aid, may reach 275,000 tons. U.S. corn exports, together with other grains and products, are expected to total about \$51 million. Total U.S. exports to Kenya may reach \$60 million in FY 1985, compared with only \$17.5 million in FY 1984. Kenya has generally managed to provide the logistical support to move large amounts of food imports from its port, but not always to every locality.

^{1/} In this article, food aid values refer to the commodity value only. Total food aid costs also include substantial freight costs, depending on the specific program.

Severe drought also hit Sudan in 1984, and U.S. agricultural exports in FY 1985 are forecast at \$123 million. The drought sharply reduced Sudan's 1984 sorghum harvest and will drastically limit the 1985 wheat harvest. U.S. sorghum exports of about 150,000 tons will be worth nearly \$17 million, a trade reversal for Sudan which normally exports sorghum. U.S. wheat and product exports could exceed 540,000 tons valued at \$88 million.

Exports to Somalia should increase slightly to \$33.6 million, largely as food aid. In addition to receiving Title II aid, Somalia will receive commodities under the Title I program valued at \$20 million.

Tanzania's food deficit continues, and U.S. exports, mainly as food aid, could increase to \$14 million in FY 1985, compared with 1984's \$10.2 million. Major export items will be grains and products, vegetable oils, and nonfat dry milk. Likewise, exports to both Rwanda and Burundi will increase because of unusual food shortages but on a smaller scale. Food aid under Title II programs will account for most of the exports, forecast to reach \$7 million and \$6 million, respectively.

Exports to Southern Africa To Fall

U.S. agricultural exports to Southern Africa are projected to decline, assuming a return of more normal rainfall and corn harvests in 1985 in South Africa and neighboring countries. U.S. corn exports to South Africa are projected to drop from 2.7 million tons at \$400.4 million in FY 1984 to about 1.4 million tons, at about \$182 million in 1985. Total U.S. agricultural exports to South Africa are expected to drop from 1984's \$525 million to about \$278 million in 1985. Rice exports are expected to hold at about 140,000 tons, but the value will drop slightly to \$52 million. U.S. oilseed and product exports, which dropped in FY 1984 to \$11.9 million, will drop again because of assumed increases in South Africa's 1985 oilseed crops and higher imports from Latin American suppliers.

Exports to Mozambique should more than double to \$32 million, virtually all as food aid, with \$17 million under a new Title I program and the remainder largely as emergency aid under Title II and Section 416. These figures could increase, depending on how well Mozambique's domestic production recovers in 1985. Some export gains are also forecast to Zimbabwe because of a new Title I program in 1985, worth \$8 million in wheat. This program will account for over three-quarters of the projected total exports. Zimbabwe apparently will not need to import corn in 1985 because of better rains.

U.S. exports to Lesotho are projected to increase to \$10.5 million, with Title II food aid continuing at a relatively high rate. Major items will be wheat and products, nonfat dry milk, and vegetable oil. Title II is almost the sole source of the World Food Program and voluntary relief food aid in Lesotho.

Exports to West Africa To Change Little

U.S. agricultural exports to West Africa are forecast to drop less than 1 percent from those of 1984, despite significant changes forecast for individual countries. Changes in weather, the key determinant of domestic production and the resulting need for food imports, mainly account for shifts in country export patterns. Severe drought covered much of the Sahel region in 1984, leading to sharply higher food import needs in Chad, Mali, and Niger, and to increased U.S. food aid. Improved rainfall and better crops in other countries, particularly Ghana and Senegal, will lower U.S. exports to these countries in 1985.

Agricultural exports to Nigeria, the largest U.S. market in West Africa, are expected to increase slightly in FY 1985 to \$345 million. Higher wheat sales are projected to raise grain shipments from 1.7 to 1.8 million tons, despite lower corn and rice shipments. Value will not likely increase much because of lower prices. Similarly, export value should change little to other West African coastal countries, except to Liberia where exports may fall nearly 20 percent from the 1984's \$34 million.

Sales to Sahelian countries will depend on concessional financing under P.L. 480. U.S. exports to Chad are expected to rise sharply to \$17 million, mostly in grains and preparations. Exports to Niger should increase more than sevenfold over those of FY 1984 to about \$11 million, also consisting almost entirely of grains and preparations. Grain sorghum may account for 60 percent of the value. Exports to Mali could triple to over \$16 million, with rice, feed grains, and products accounting for most of the exports. U.S. exports to two other drought-affected countries with large food aid programs, Mauritania and Burkina (formerly Upper Volta), should remain close to 1984's \$17 million and \$18 million, respectively.

U.S. Exports to Sub-Saharan Africa Set Record in FY 1984

U.S. agricultural exports to Sub-Saharan Africa reached a record \$1.33 billion during FY 1984, slightly above the previous high in 1981 but 62 percent above those for FY 1983. The single major factor in this increase was the 304-percent sales jump to South Africa from \$130 million to \$525.4 million due to severe drought damage to South Africa's corn crop. This amount approached Nigeria's record in FY 1982 of \$538.2 million, 46 percent consisting of wheat and 34 percent of rice. The large increase to South Africa was almost entirely due to U.S. corn exports, moving up from 141,000 tons (\$19.2 million) in 1983 to 2.7 million tons (\$400 million) in 1984. In nondrought years, South Africa is usually a major corn exporter. U.S. rice sales to South Africa also increased 20 percent to 140,000 tons (\$58 million).

U.S. coarse grain exports to Sub-Saharan Africa increased to an unprecedented 3.2 million tons valued at \$480 million. U.S. oilseed and product exports also reached a record \$68.3 million, while rice exports dropped 25 percent to \$158 million, the lowest value since FY 1976. (Larry Witucki and Peter Riley, Africa and Middle East Branch)

Table 15--U.S. agricultural exports to Sub-Saharan Africa, FY 1981-84 and 1985 forecast

CCC Credit To Boost Exports to Middle East and North Africa

Commodity Credit Corporation (CCC) guarantees will boost U.S. agricultural exports to the Middle East and North Africa in fiscal year (FY) 1985 (October 1984-September 1985). Exports to the Mideast will climb 15 percent over those of FY 1984 to more than \$2.1 billion, and exports to North Africa will reach \$1.7 billion, a 9-percent increase. The leading Mideastern markets will be Iraq and Turkey. In North Africa, increased grain exports to Tunisia, Morocco, and Algeria will offset lower wheat and flour exports to Egypt.

Mideast Imports of U.S. Products To Advance

U.S. wheat shipments to the Mideast are forecast at 3.3 million tons in FY 1985, up 81 percent over those of 1984. U.S. coarse grain exports to the area are projected at 3.8 million tons, 46 percent above 1984 shipments. Rice will remain at about 1984's 770,000 tons.

Iraq will lead the Mideastern market for U.S. agricultural products in FY 1985 at \$763 million, an increase of over 80 percent, virtually all under CCC's Export Credit Guarantee Program (GSM-102) and blended credit programs. Iraq will take over 1.1 million tons of wheat and flour, over 400,000 tons of rice, and about 900,000 tons of coarse grains. The CCC has provided credit for purchases of soybean meal, beef, seeds, and live animals in FY 1985, and has extended the commodity list to include funds for tobacco.

U.S. agricultural exports to Turkey should reach \$262 million in FY 1985, 18 percent above 1984's record. Again, the GSM-102 and blended credit programs will play major roles. Wheat shipments will reach about 850,000 tons at \$123 million because of lower domestic output in 1984. Turkey is feeding more of its livestock to meet increasing export demand and will take approximately 850,000 tons combined of barley and corn at \$97 million and about \$37 million, respectively. Soybeans, a newcomer to the list of U.S. exports to Turkey, will reach 77,000 tons at \$17 million.

U.S. agricultural exports to Saudi Arabia may increase slightly, especially for feed grains, following the 12-percent rise in FY 1984 to \$496 million because of the installation of feed grain bagging facilities in Saudi ports. Wheat exports are forecast to drop because Saudi Arabia's output increasingly meets domestic requirements. But, a special trade in seed wheat remains. Processed food sales may climb further with rising sales at supermarkets. Vegetable oil sales may also rise. Horticultural product exports to the Arabian Peninsula increased about 20 percent in FY 1984, and the upward trend is expected to continue in 1985.

U.S. exports to Jordan are projected at \$95 million, matching 1984's shipments. Wheat exports are forecast at 340,000 tons, following a devastating 1984 drought that lowered wheat production to 15,000 tons, only one-tenth of 1983's output. Coarse grain exports, at 194,000 tons, will exceed those of 1984 by about 44 percent, as the poultry sector continues to expand.

U.S. agricultural exports to Israel are projected at just under \$300 million in FY 1985, about 15 percent below those of 1984. Lower prices account for a good part of the value decline. With substantially lower wheat output following the worst drought in two decades, wheat imports are expected at about the same level as 1984's

505,000 tons. Coarse grain exports to Israel will drop to 850,000 tons, slightly lower than 1984's 897,000 tons, and soybean exports are projected at 420,000 tons, about the same as in 1984.

Competitive prices will spur Kuwait to take 50,000 tons of U.S. white wheat, indicating opportunities for gains in nontraditional markets of the Mideast.

Increased Sales to Maghreb Offset Declines to Egypt

Increased grain sales to Tunisia, Morocco, and Algeria in FY 1985 partly offset a 25-percent reduction in wheat and flour exports to Egypt, with blended credit playing a major role. This decline kept volume near 5 million tons in FY 1984.

Gains for other commodities will more than offset the decline in U.S. wheat and flour exports to Egypt in FY 1985 to approximately 2.7 million tons. U.S. agricultural exports to Egypt are forecast at \$1 billion, up 13 percent over FY 1984. Competition from Argentina and lower prices may cause a decline in the U.S. export value of feed grains to Egypt. However, exports of cotton, tobacco, and soybeans are expected to increase dramatically. U.S. tobacco exports are likely to quadruple the \$26 million of FY 1984. Egypt's 1985 trade will reflect its smaller cotton and soybean harvests in 1984. GSM-102 credit of \$50 million has already been provided for cotton, and Egypt needs additional quantities for its expanding textile industry. Egypt plans to sharply increase soybean imports to utilize new crushing facilities.

U.S. agricultural exports to Tunisia will reach \$140 million in FY 1985. Poor weather in Tunisia in late April and May 1984 yielded a mediocre grain harvest rather than the anticipated bumper crop. As a result, wheat imports from the United States are expected to reach 700,000 tons. Tunisia's growing poultry and livestock sectors will raise corn sales to 230,000 tons.

Drought in southern Morocco for the third year, \$244 million of blended credit, and an additional \$20 million of Public Law (P.L.) 480 Title I aid will raise imports of U.S. grain to 2.2 million tons in FY 1985. Morocco, whose economy is severely depressed, is purchasing the cheapest wheat available.

Poor rainfall in western Algeria will raise U.S. wheat exports to about 800,000 tons in FY 1985, mostly in higher valued durum wheat. A policy emphasis on expanding the livestock sector will boost Algerian imports of U.S. corn to 450,000 tons.

Libya has maintained a virtual boycott of American products. Seeds, frozen potatoes, parboiled rice, and fruit-soft drink concentrates have been the only items purchased in recent years. Although Libya purchased over 30,000 tons of durum wheat in 1984 because of exceptional circumstances, it is unlikely to buy from the United States in 1985. (Michael E. Kurtzig, John Parker, and David Skully, Africa and Middle East Branch)
